PROFESSIONAL SUMMARY

Software Engineer with a strong focus on AI systems, distributed data pipelines, and solving real-world problems under ambiguity. Experienced in designing scalable architectures, debugging complex systems, and making practical trade-offs across performance, cost, and reliability. Proven ability to work across AI, data, and cloud systems to deliver end-to-end solutions. Brings a strong system-thinking mindset with hands-on experience in evaluating model behaviour, optimizing pipelines, and influencing technical decisions in fast-paced environments.

EDUCATION

Vellore Institute Of Technology

Bachelor of Technology in Computer Science Engineering; **(8.96/10)**

Specialization: Artificial Intelligence and Machine Learning

Bhopal, M.P.

July 2021-Oct 2025

Tagore Academy Public School

Higher Secondary Certificate (HSC); **(87.4%)**

Faridabad, Haryana

July 2020

Bohra Public School

Secondary School Certificate (SSC); **(90.2%)**

Faridabad, Haryana

May 2018

SKILLS SUMMARY

Programming Languages: C++, Python, SQL

Databases & Cloud: MySQL, Snowflake, Amazon Web Services (AWS) – EC2, S3, Lambda, QuickSight, Athena

Big Data & Streaming: Apache Kafka, Hadoop

Data Analytics & Visualization: Tableau, Qlik Sense, Power BI, Matplotlib, Seaborn

Machine Learning & AI: TensorFlow, Pytorch, Scikit-learn, NLP, Computer Vision (OpenCV, YOLO), Predictive Analytics, Time Series Forecasting, LLM Evaluation, Prompt Engineering

Data Handling & Processing: Pandas, NumPy, ETL Pipelines, Data Cleaning, Data Transformation, Feature Engineering

Systems & Architecture: Distributed Systems, Data Pipelines, Real-Time Streaming

EXPERIENCE

Micro1.ai

Dec 2025 - Present

Advance AI Trainer/Model Evaluator(Remote)

Palo Alto, California

- Evaluated and stress-tested LLM outputs under ambiguous scenarios, identifying failure patterns in reasoning, hallucination, and edge-case handling
- Designed evaluation frameworks to benchmark model performance across accuracy, consistency, and contextual understanding
- Applied system-level thinking to optimize prompt strategies, improving reliability and reducing hallucination rates
- Collaborated with global teams to refine AI evaluation pipelines and alignment strategies
- Acted as a bridge between model behaviour and real-world application constraints, influencing deployment decisions

Vision Netsoft Pvt Ltd

Nov 2023 - Feb 2024

Data Science Intern

Faridabad, Haryana

- Built interactive dashboards to analyse customer behaviour and service trends, enabling data-driven decision-making
- Developed predictive models to forecast demand and optimize resource allocation
- Applied statistical analysis and data modelling to uncover operational inefficiencies and improvement opportunities

PROJECTS

Self-Directed Project

Cryptocurrency Trade Data Platform

- Designed a real-time streaming architecture using Apache Kafka and AWS services for high-frequency trading data
- Built distributed pipelines with AWS Athena and QuickSight for scalable querying and visualization
- Made architectural trade-offs between latency, cost, and scalability for real-time analytics
- Integrated predictive models to support automated decision-making and improve trading insights

Self-Directed Project

AI Powered Data Analyst Agent

- Architected an AI-driven system capable of processing structured and unstructured data (CSV, PDF, DOCX, images with OCR)
- Designed modular pipelines for ingestion, analysis, and visualization with scalable system behavior
- Integrated LLM-based reasoning with analytics workflows, balancing accuracy, performance, and usability
- Enabled multi-turn conversational querying with context-aware insights

Self-Directed Project

Player Re-Identification System | Computer Vision Project

- Built an end-to-end vision pipeline using YOLO and DeepSORT for real-time object tracking
- Debugged complex edge cases including occlusion, motion blur, and identity loss
- Designed feature-matching strategies for consistent identity tracking in dynamic environments
- Optimized inference pipeline for performance vs accuracy trade-offs

CERTIFICATIONS & ACCOMPLISHMENTS

- *Micro1.ai Certified Machine Learning Engineer*: Validated expertise in applied machine learning, model evaluation, and real-world AI system Performance Optimization
- *AWS Certified Solution Architect*: Validated **Cloud Architecture and deployment strategies**, showcasing expertise in data streaming, predictive analytics and **scalable cloud integration with AWS services**.
- *Applied Machine Learning in Python*: Implemented end-to-end ML workflows in Python including **data pre-processing, feature engineering, supervised learning models, cross-validation, and performance evaluation using scikit-learn**.
- *Research Collaboration*: Co-authored a research paper titled "**A Study on Machine Learning Techniques for Rainfall Prediction in the Indian Agricultural Landscape**."

LEADERSHIP & VOLUNTEER EXPERIENCE

Technical Assistant – D2C Igniters Club, VIT Bhopal

June 2023 – May 2024

- Led **technical presentations & documentation**, supporting advisory meetings that secured **₹100K** in funding.
- Organized **10+ technology events**, including **hackathons & workshops**, impacting **200+ students**.
- Mentored a **20+ member team**, enhancing their technical and problem-solving skills.

Campus Ambassador – Internshala

Aug 2022 – Sep 2022

Spearheaded **outreach campaigns**, engaging **1,500+ students**, increasing platform registrations by **20%**.
